POWERING THE
FUTURE OF CRYPTO

Welcome To
Celluloid Group

*Crypto payments for luxury goods
(buying cars with Celluloid coin).*

Wealth & lifestyle associated with cryptocurrency success.

The dream/goal in crypto culture:

“CELLULOID” as a symbol of financial freedom.

Digital assets real-world value.

Celluloid cryptocurrency with luxury, lifestyle, and futuristic finance

CELLULOID TOKEN

"When we attempt to govern chaos, we discover that humans themselves are the variables."
In the river of time, each leap of civilization is accompanied by a redefinition of "order."
From stone tablets to laws, from empires to charters, from paper currency to cryptographic currencies—humans continuously create tools, and are in turn shaped by the very tools they create.

Now, deep within the chain, a new order is quietly emerging.
It belongs to no nation, depends on no market, and relies not on human will. It comes from parameters, algorithms, and consensus; it self-adjusts, self-repairs, and requires no trust.
This is the Celluloid concept.

➤ Governance Layer

➤ AI Advisory Layer

➤ Autonomous Execution

100 % Decentralized

A decentralized smart contract is an autonomous, self-executing program stored on a blockchain, such as BNB. Unlike traditional contracts that rely on legal systems and third-party enforcement, the terms of a decentralized smart contract are written directly into code, which is executed and verified by a decentralized network of computers. This eliminates the need for intermediaries like banks, brokers, or lawyers, creating a trustless and transparent system.

BNB CHAIN

BEYOND BINANCE

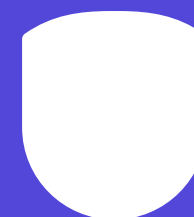

BLOCKCHAIN - BEP20

BNB Chain is an open-source, decentralized blockchain ecosystem that combines the original Binance Chain (now the BNB Beacon Chain) and the BNB Smart Chain (BSC). It supports smart contracts, offers high speed, low transaction fees, and is compatible with Ethereum, allowing developers to build and run decentralized applications (DApps) for finance (DeFi), gaming (GameFi), and other Web3 services.

FASTEST BLOCKCHAIN

A 750ms block time, processing 100 million gas per second

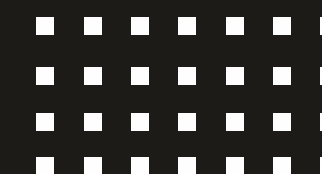

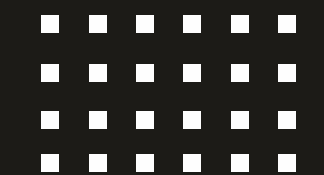

SAFE & SECURED

Incorporating slashing penalties to deter malicious behavior and enhance network security

CLD TOKEN Launch & Roadmap to 2027

*Pioneering Crypto Utility & EV
Integration for a Sustainable Future*

2025
Project Launch
*Successful initiation of the new
project in early 2025*

2026
Expansion
*CLD TOKEN Scaling operations
and increasing reach
throughout 2026*

2027
Full Implementation
*CLD TOKEN Complete rollout and operational
efficiency achieved by 2027*

Total Supply :300 million CLD _{TOKEN}

Category	Allocation %	Allocation
Pre-Sale	50%	150,000,000
Ev _{Developrs}	20%	60,000,000
Gaming	15%	45,000,000
Liquidity	10%	30,000,000
Develops	5%	15,000,000
